Amazon/DFG

Toronto, ON, Canada.

Month Year – Present

- Deliver packages to the recipient's home

**Awards/Accomplishments:** N/A

**Special Achievements:** N/A

## SWOT Analysis

### Strengths

- Efficient with using my time at work
- Focused
- Hard working
- Good communication skills
- Patient
- Able to manage working under pressure

### Weaknesses

- Very lenient – I plan on overcoming this weakness by creating set requirements. If my co-workers or business partners don't meet a set of requirements for a task or project, I must stick by those requirements to ensure the quality of work.

### Threats

- Competition – As the technological field continues to grow, there are many people getting into IT and CS, making it more difficult to obtain a job. But I feel that applying to as many places as possible and working hard to attain what you want will help me overcome this threat.

### Opportunities

- Growth in the technological field – With lots of growth, means more business and people working in the same aspect of work, giving a great opportunity to make connections to help grow my network.

### **Elevator Pitch**

My name is Amin and I am interviewing for the role of Software Developer. I think I could be a fantastic addition to your department, and here my reasons.

For this role, my abilities and experience are a great match. Working with various languages such as C#, Java, Python, and HTML, I have good experience, which makes me a perfect job applicant. Further building this foundation, I have studied at Centennial College as a Software Engineering Technician and have obtained my diploma as a Software Engineer.

Some core skills that I have acquired is being efficient in, Software Development, Website Development, MySQL Database, Java, and Linux CMD. On the lighter note, a few soft skills that I possess are, being a good problem solving, efficient time management, great leadership, easy to work with others, precision to detail, and good communication skills.

Thank you for the question, I appreciate you giving me the time to answer.
